# Saw-horse

# ALBA<sup>+</sup> KRAPP

## The steel wood pro

All practice equitable characteristics appoint the unique functionality of the solid ALBA-KRAPP saw-horse made out of electro galvanized whole metal. It begins with the extreme stableness due to the own weight, combined with the wide straddled main pillar, and pursue to the adjustable deflector device.

Another advantage is the standard mounting for all types' chain saws that could be mounted optional left or right. Working on small or short wooden pieces is enabled due to the large, perusing bed.

Conclusion: This Swiss product is the best choice for the one who appreciate true quality!
